

C+M Horizontal Balers

High density, high production balers for paper, non-ferrous, fiber and plastic recycling.

C+M Model 3430-OE310 with double tension option

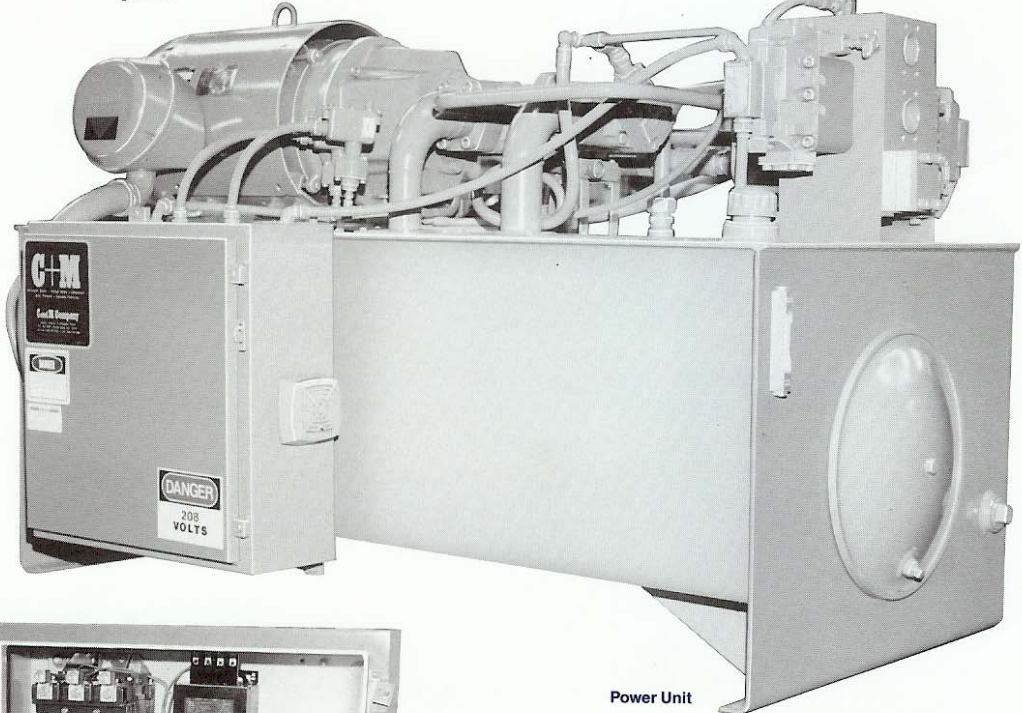

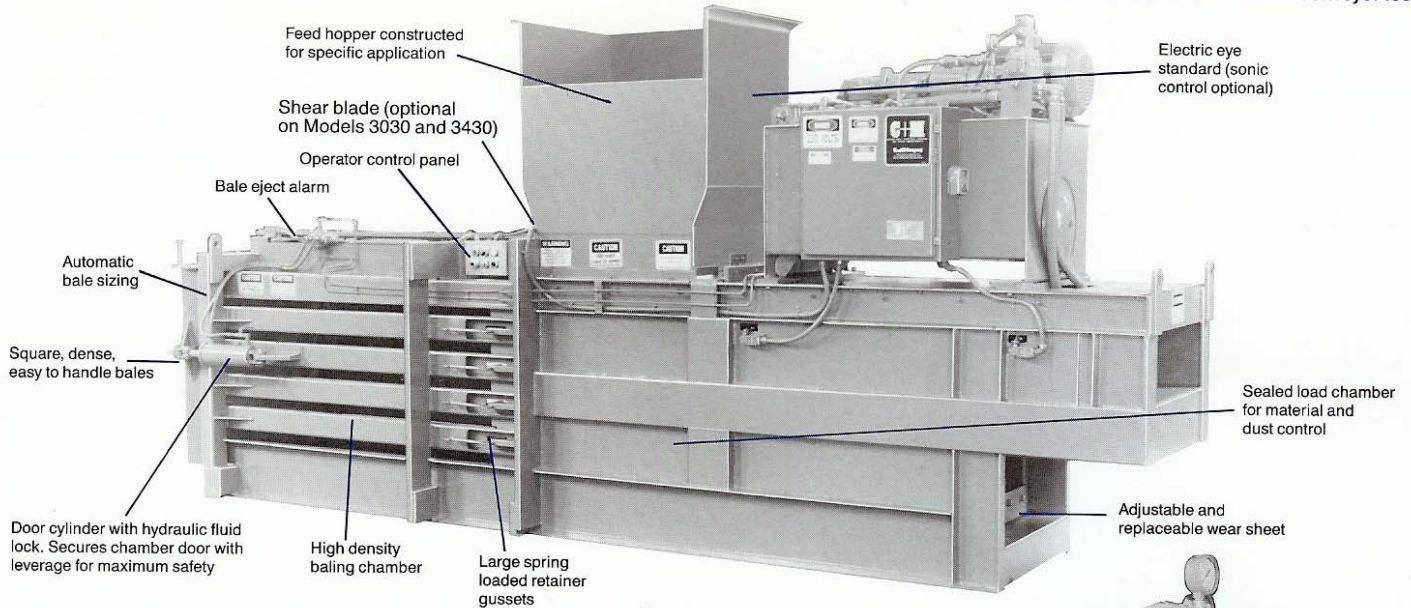

C+M Model 6046-OE310 with Material Convertor

Quality, value, service at affordable prices.

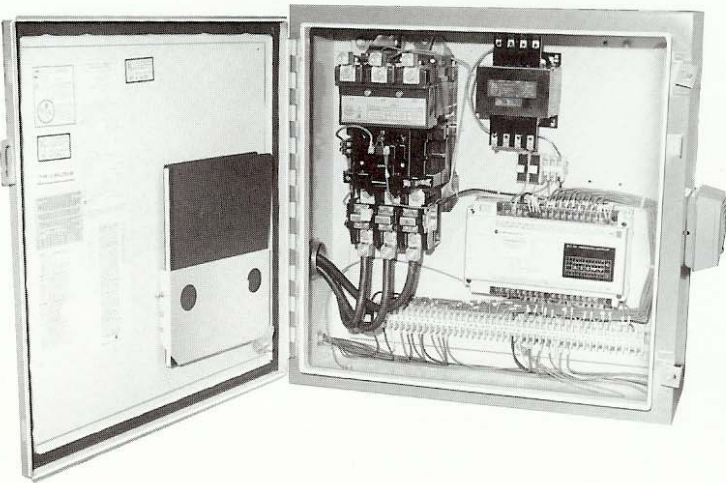

C+M Horizontal Balers provide a durable baling system with heavy construction for high density bales. All C+M models can be custom built to required specifications.

C+M Model 3430-7256 with conveyor feed hopper

Power Unit

All C+M power units meet JIC and NFPA standards for hydraulic systems. The unit features standard components for easy service, integral valve design for higher flows and efficiency, and high-performance vane pumps with replaceable cartridges. An air-to-oil cooler is standard on all 100 GPM units and larger.

Control Panel

The C+M UL listed control panel features a solid state programmable controller. All PLC units are programmed by computer, with a print out diagram provided in the baler manual. Each electrical component is UL listed, and NEMA type 12 enclosures are standard.

Wire Products + Hydraulic Platforms

Horizontal Balers

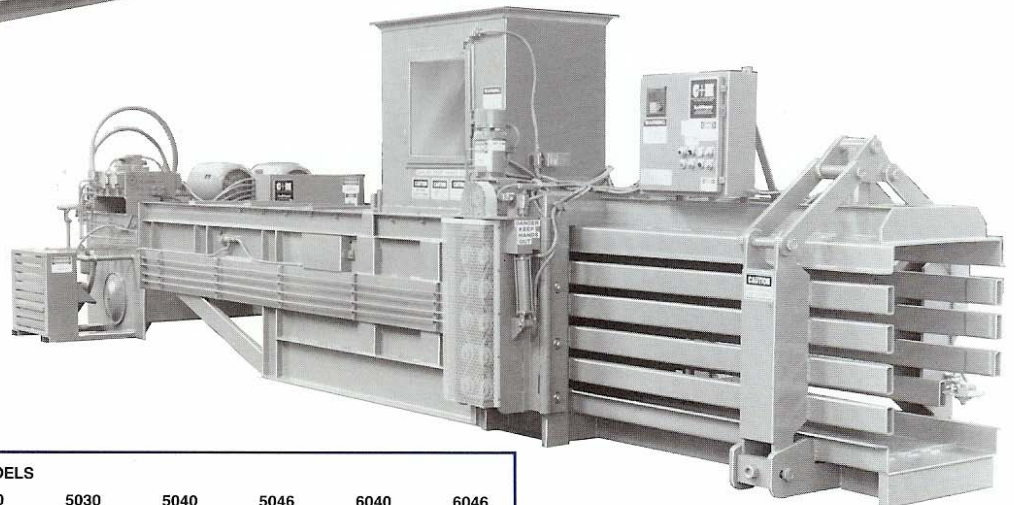

C+M Horizontal Balers are built tough to handle waste problems safely and economically. Every C+M baler is constructed and designed for extended usable life and built by technicians with years of experience. Each C+M Horizontal Baler is manufactured to exceed ANSI and OSHA standards for baling equipment.
